Hi Sury,

I found this file which contains HERO ids for the studies evaluated using John Whalan's exposure criteria which may help you.

Yes, I found few references which are not FA, but genetox

Thanks, Sury, sounds good. Any references you can add HERO IDs for would be helpful, even if not in genetox section.

Hi Andrew,

In the Animal GeneTox table I found only a couple of references that are missing HERO IDs. Hope I did not miss, I will check again. Also, I noticed few comments for references that I will fix those. For example, cross references pertaining to GeneTox methods cited in Human studies. So it should be done by today or tomorrow. Just to give you a heads up.

Best,
Sury

Sure Andrew,

Can you send me the link to the latest version of the Appendix.

Best,
Sury

Subject: Appendix genetox references

Hi Sury, happy Monday.

I think a note may have been sent previously, but just in case I wanted to be sure you know there are a number of references in the genotoxicity section of the appendix (e.g., the animal data table) that do not have HERO IDs. Do you think you can please go in over the next couple days and add unformatted HERO IDs (and have them tagged to the HERO formaldehyde project if they are not tagged as such already) for these references?

Thank you!
-Andrew
